

Rahul Sharma

Nandyal, Andhra Pradesh | rahul.sharma@email.com | (555) 987-6543

Professional Summary

Forward-thinking software engineer with a strong focus on artificial intelligence, large language models, and system integrations. Passionate about evaluating new tech and building efficient, scalable tools.

Experience

AI Solutions Developer | Tech Innovators LLC

- Researched and evaluated various foundation models, integrating Gemini AI and Meta AI into internal workflows to automate data extraction.
- Subscribed to and utilized Google AI Pro to leverage Google AI Studio for complex prompt engineering and model tuning.
- Built full-stack applications using Python, integrating AI image generators for the marketing team.

Systems Technician | Freelance

- Managed the installation and technical configuration of hardware and network connections for local clients.
- Coordinated with field service engineers to ensure stable, high-speed fiber and wireless internet deployments (including JioAirFiber setups).

Education

B.S. in Computer Science | 2024

Skills

Python, API Integration, Prompt Engineering, Network Configuration, Troubleshooting.
